ABOUT

SENTRIX MONITORING

Sentrix Monitoring is a technology-driven security company specializing in 24/7 Remote Video Monitoring, Virtual Guard Services, and Live Audio Intervention. We combine highly trained monitoring specialists, AI-assisted analytics, and proprietary security technology to deliver proactive protection for businesses, commercial properties, industrial facilities, and critical infrastructure. Unlike conventional CCTV systems that only record incidents, our operators actively monitor live video feeds, verify suspicious activity, intervene through live voice warnings, and coordinate with emergency responders when required. Our objective is simple: stop incidents before they become losses. With operations managed from our technology office in Pakistan and strategic leadership based in Dubai, Sentrix delivers reliable and scalable security solutions built around international standards and modern surveillance technologies. As one of Pakistan's pioneering companies dedicated exclusively to professional Remote Video Monitoring and Virtual Guard Services, Sentrix is helping transform traditional security into intelligent, technology-driven protection.

VISION

To become one of the world's most trusted providers of intelligent remote guarding solutions by delivering innovative, reliable, and proactive security services that protect businesses, people, and assets.

MISSION

To reduce crime, prevent financial losses, and improve customer safety through advanced monitoring technology, AI-assisted detection, highly trained monitoring specialists, and rapid emergency response.

To become a globally trusted leader in intelligent remote security by delivering innovative, reliable, and proactive protection for businesses, people, and assets.

OUR SERVICES

24/7 Remote Video Monitoring

Professional monitoring specialists actively monitor customer sites around the clock, identifying suspicious activities and responding immediately to potential security threats.

VIRTUAL GUARD SERVICES

An advanced alternative to traditional security guards, providing continuous surveillance and immediate response while significantly reducing security costs.

LIVE AUDIO INTERVENTION

Using our proprietary audio intervention platform, operators communicate directly with intruders in real time, warning them that they are being monitored and instructing them to leave the premises before incidents escalate.

POLICE, FIRE & EMERGENCY DISPATCH

When intervention alone is insufficient, our monitoring center immediately coordinates with police, fire departments, ambulance services, or designated emergency contacts according to customer procedures.

AFTER-HOURS MONITORING

Protecting businesses during evenings, weekends, holidays, and other high-risk periods when properties are most vulnerable.

INCIDENT REPORTING & EVIDENCE MANAGEMENT

Every event is documented with comprehensive reports, timestamps, operator actions, screenshots, and video evidence to provide complete incident documentation.

INDUSTRIES WE SERVE

Sentrix Monitoring provides customized security solutions for organizations across multiple industries.

Our monitoring services are ideal for:

HOW OUR MONITORING WORKS

01. SECURE VIDEO STREAMING

Customer cameras securely stream video to our monitoring center using RTSP technology without disrupting the existing surveillance infrastructure.

03. HUMAN VERIFICATION

Every alert is immediately reviewed by trained monitoring specialists to eliminate false alarms and verify genuine threats.

05. EMERGENCY RESPONSE

If required, police, fire departments, ambulance services, or designated contacts are immediately notified based on customer-specific procedures.

02. AI-ASSISTED DETECTION

Artificial intelligence continuously analyzes incoming events and alerts our operators whenever suspicious activity is detected.

04. LIVE AUDIO INTERVENTION

Artificial intelligence continuously analyzes incoming events and alerts our operators whenever suspicious activity is detected.

04. INCIDENT REPORTING

Every event is documented with complete reports, timelines, screenshots, and video evidence, providing customers with a full record of the incident.

TECHNOLOGY PLATFORM

Sentrix Monitoring is built on modern, secure, and scalable technology designed for enterprise-grade security operations.

Our technology includes:

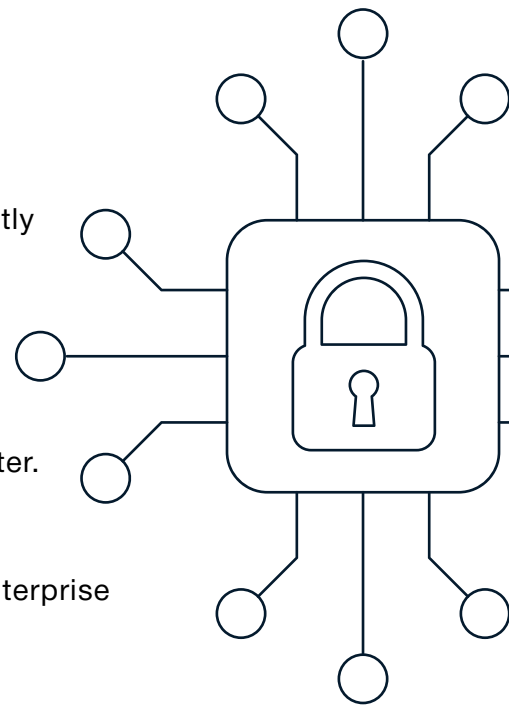

CYBERSECURITY & DATA PRIVACY

Cybersecurity is one of the core principles behind every Sentrix deployment.

Our security architecture is designed to protect both customer infrastructure and operational data while minimizing cybersecurity risks.

Key security features include:

- Secure RTSP streaming architecture.
- Proprietary live audio intervention technology that operates independently without modifying customer cameras, DVRs, or NVRs.
- No interference with existing surveillance infrastructure.
- Minimal network exposure for enhanced cybersecurity.
- Secure communication between customer sites and our monitoring center.
- Controlled operator access and secure operational procedures.
- Suitable for organizations with strict security requirements, including enterprise customers, financial institutions, and government facilities.

WHY CHOOSE SENTRIX MONITORING?

Businesses choose Sentrrix because we focus on preventing incidents, not simply recording them.

OUR ADVANTAGES INCLUDE

- ✓ 24/7 Professional Monitoring Center
- ✓ AI-Assisted Threat Detection
- ✓ Real-Time Human Verification
- ✓ Proprietary Live Audio Intervention Technology
- ✓ Immediate Police, Fire & Emergency Dispatch
- ✓ Enterprise-Grade Cybersecurity
- ✓ No Changes Required to Existing Camera Infrastructure
- ✓ Cost-Effective Alternative to On-Site Security Guards
- ✓ Highly Trained Security Monitoring Specialists
- ✓ Customized Monitoring Procedures
- ✓ Detailed Incident Reports with Video Evidence
- ✓ Scalable Solutions for Small Businesses, Multi-Site Operations, and Enterprise Organizations

OUR COMMITMENT

At Sentrrix Monitoring, we believe security should be proactive rather than reactive.

Our dedicated monitoring specialists work around the clock to identify threats, respond immediately, and help protect our clients' people, property, and assets before incidents occur.

We are committed to delivering reliable service, advanced technology, rapid response, and long-term partnerships built on professionalism, trust, and continuous innovation.
